Electrostatics : Tutorial / V. Arkhipov; The Ministry of Education and Science of the Russian Federation, Kazan National Research Technological University. – Kazan : KNRTU Press, 2024. – 88 p.

ISBN 978-5-7882-3492-2

The tutorial outlines the main issues of the General Physics course (sections Electricity and Magnetism). It contains theoretical material on the topics: electric field, conductors and dielectrics in an electric field, electric field energy, analysis of solutions to typical problems, and self-check questions.

The tutorial is intended for students studying Bachelor program 18.03.01 Chemical Technology of all specialties of mechanical and technological profiles in order to strengthen the theoretical foundations of the General Physics course.

The tutorial is prepared by the Department of Physics.

CONTENTS

Introduction	5
1. ELECTRIC FIELD	9
1.1. Electric charge.....	9
1.2. Coulomb's law	11
1.3. Electrostatic field strength.....	12
1.4. Electrostatic field potential	14
1.5. Theorem on the circulation of the field strength vector.....	16
1.6. Relationship between electric field strength and field potential.....	17
1.7. Principle of electric field superposition	18
1.8. Graphic representation of electrostatic fields.....	20
1.9. Ostrogradsky–Gauss theorem	22
1.10. Field of an infinite homogeneously charged plane.	24
1.11. Field of an infinite uniformly charged thread	26
1.12. Problems	27
Self-check questions.....	34
2. CONDUCTORS IN AN ELECTROSTATIC FIELD	35
2.1. Properties of electron gas in metals	35
2.2. Electric field inside and near the surface of the conductor.....	36
2.3. Van de Graaff electrostatic generator	39
2.4. Electrical induction and induced charges.....	41
2.5. Electrostatic protection.....	41
2.6. Capacitance	43
2.7. Problems	46
Self-check questions.....	49
3. ELECTRIC FIELD IN DIELECTRICS.....	51
3.1. Electric dipole	51
3.2. Dipole in a uniform electrostatic field	53
3.3. Polarization of dielectrics.....	55
3.4. Mechanisms of polarization of dielectrics	57
3.5. The relationship between dielectric susceptibility and permeability.	60
3.6. Electric displacement vector or electric induction vector.....	61
3.7. Conditions on the interface between two dielectrics	62
3.8. Ferroelectrics or segnetoelectrics	65
3.9. Electrets	67
3.10. Problems	68
Self-check questions.....	74

4. ELECTRIC FIELD ENERGY	75
4.1. Energy of a charged conductor	75
4.2. Energy of a system of fixed charged conductors	76
4.3. Energy of a dipole in an electric field	77
4.4. Energy of a charged capacitor	78
4.5. Volumetric density of electric field energy	79
4.6. Problems	80
Self-check questions	84
Conclusion	85
Bibliography	86
